Planning Commission Hearing:	May 4, 2026 @ 6:00 p.m.
Board of County Commissioners Hearing:	May 12, 2026 @ 2:30 p.m.

I. EXECUTIVE SUMMARY

The applicant requests approval of a major amendment to the Pinery Meadows Planned Development (Pinery Meadows PD) to establish setbacks specific to single-family detached cluster lots. The proposal will also adjust the setbacks for the single-family attached lots and will modify general notes as originally approved with the Pinery Meadows PD. The proposed amendment does not increase density, as the total number of dwelling units allowed per the Pinery Meadows PD remains unchanged at 170 units.

The Planning Commission will hear the request at its May 4th public hearing. Staff will provide an update to the Board at the public hearing.

II. APPLICATION INFORMATION

A. Applicant

Integrity Land Ventures
7200 S. Alton Way, Suite C400
Centennial, CO 80112

B. Request

Approval of a major amendment to the Pinery Meadows PD to establish development standards specific to the 68 single-family detached cluster lots within the Pinery Meadows subdivision. The request will also adjust other development standards related to setbacks and private roads.

C. Process

A major amendment to a PD is processed pursuant to Sections 1519 through 1523 of the Douglas County Zoning Resolution (DCZR). The request meets the eligibility criteria of DCZR 1519.05 as the proposed amendment makes substantial changes to development standards.

Per DCZR Section 1522.08, “The Board shall evaluate the major amendment, referral agency comments, staff report, the Planning Commission recommendation and public testimony, and shall approve, conditionally approve, table for further study, remand to the Planning Commission or deny the amendment. The Board’s comments shall be based on the evidence presented, compliance with the adopted County standards, regulations, policies and other guidelines.”

D. Location

The Pinery Meadows PD is generally located approximately 850 feet northwest of the intersection of State Highway 83 and Scott Avenue. The Pinery Meadows PD abuts PD zoning on all sides; State Highway 83 also borders the eastern boundary. Vicinity, zoning, and aerial maps are included as an attachment to the staff report to highlight site location and existing conditions.

E. Project Description

The applicant requests a major amendment to the Pinery Meadows PD to establish setbacks specific to single-family detached cluster lots. The setbacks for these lots will be five feet from lot lines as depicted on the Lot Standards Table on sheet 2 of the planned development document. The amendment will also modify setbacks for single-family attached lots and replace the term “private alley” with “private road” to be consistent with the roads as shown on the approved final plat.

The request will also add language within the PD document to allow encroachments into utility easements with an encroachment agreement from utility providers. CORE Electric Cooperative (CORE) initially provided referral comments not in support of the PD amendment stating that the proposal would affect CORE’s ability to maintain required clearances to structures and would hinder safe, unrestricted and continuous access necessary for the operation, maintenance, repair, and replacement of utility infrastructure.

The applicant met with CORE to discuss the referral comments and will proceed with the proposed PD amendment as initially submitted. The applicant is aware that CORE does not allow any encroachments into utility easements except a second-story, 2-foot eave cantilever into a utility easement as referenced in CORE’s updated comments from an email dated April 20, 2026. CORE has no further objections to the request, provided that the structural setbacks can be met, and that no improvements are located within utility easements that conflict with or interfere with the construction, maintenance, or access to electrical facilities.

The applicant acknowledged CORE's updated response and confirmed that future structures will meet setbacks as outlined in the Pinery Meadows PD. The applicant also confirmed that easements will not contain structures that conflict with or interfere with the construction, maintenance, and access to utility easements as indicated by CORE.

III. CONTEXT

A. Background

The Pinery Meadows PD was approved by the Board of County Commissioners (Board) in February of 2023. This is the 1st Amendment to the original PD. The Pinery Meadows subdivision was approved by the Board in February of this year for a total of 136 residential lots, 11 tracts, and associated public and private roads. The subdivision provides a variety of housing types, including 40 single-family attached (duplex), 28 single-family detached, and 68 single-family detached cluster lots.

IV. PROVISION OF SERVICES

A. Fire Protection

Fire protection is provided by South Metro Fire Rescue (South Metro). South Metro reviewed the request and had no comment on the proposed amendment.

B. Sheriff Services

The Douglas County Sheriff's Office provides police protection to the site.

C. Water and Sanitation

No change in water supply or demand is associated with the request.

V. PUBLIC NOTICE AND INPUT

DCZR Section 1523 requires mailed notice to abutting landowners, published notice, and posted notice of the public hearings. Courtesy notices were also mailed to abutting property owners. No public correspondence has been received related to this application. All referral agency comments are outlined in the Referral Agency Response Report attached to the staff report, and the applicant has provided a written response to referral comments which is also included within the staff report appendix.

VI. PLANNING COMMISSION HEARING

The Planning Commission will hear the request at its May 4th public hearing. Staff will update the Board on the outcome of the Planning Commission hearing.

VII. STAFF ANALYSIS

Section 1520 of the DCZR establishes criteria to be considered in the review of a major PD amendment application.

1520.01: Whether the amendment is consistent with the development standards, commitments, and overall intent of the planned development.

Staff Comment: The proposal does not increase the density of the Pinery Meadows PD, and no PD commitments are modified by the proposed PD amendment.

1520.02: Whether the amendment is consistent with the intent, efficient development and preservation of the entire planned development.

Staff Comment: The proposed changes to the development standards are in keeping with the residential nature of the Pinery Meadows PD.

1520.03: Whether the amendment will adversely affect the public interest or enjoyment of the adjacent land.

Staff Comment: The proposed amendment will not adversely affect public interest or enjoyment of adjacent land.

1520.04: Whether the sole purpose of the amendment is to confer a special benefit upon an individual.

Staff Comment: The amendment benefits the community by allowing greater variety of housing types within the development.

1520.05: For applications proposing an increase in the intensity of allowed land uses, including changes in densities, whether the amendment is consistent with the water supply standards in Section 18A, Water Supply Overlay District, of this Resolution.

Staff Comment: This amendment does not increase the intensity of allowed land uses within the Pinery Meadows PD. This amendment establishes setbacks specific to the 68-cluster detached single-family lots.

1520.06: Whether the public facilities and services necessary to accommodate the proposed development will be available concurrently with the impacts of such development.

Staff Comment: No change in public facilities or services is associated with this request.

1520.07: Whether the roadway capacity necessary to maintain the adopted roadway level of service for the proposed development will be available concurrently with the impacts of such development.

Staff Comment: The proposed PD amendment does not impact the roads serving the subdivision and surrounding area. No additional impact to the roadway capacity and level-of-service is expected by this proposal.

VIII. STAFF ASSESSMENT

Staff assessed the major amendment request in accordance with Sections 1519-1523 of the DCZR. Should the Board find that the approval criteria for the major amendment are met, the following proposed conditions should be considered for inclusion in its motion:

1. Prior to recordation, all minor technical corrections will be made to the Planned Development document to the satisfaction of Douglas County.
2. All commitments and promises made by the applicant or the applicant’s representative during the public hearing and/or agreed to in writing and included in the public record have been relied upon by the Board of County Commissioners in approving the application; therefore, such approval is conditioned upon the applicant’s full satisfaction of all such commitments and promises.

PROJECT BACKGROUND AND JUSTIFICATION FOR AMENDMENT

This application is for an amendment to the recorded Pinery Meadows Planned Development (PD) to incorporate lot standards for the planned single family detached cluster homes. Because this product type does not fit onto lots in a traditional orientation (shared driveways, front doors do not face the road) current setbacks outlined in the PD for all single family detached homes are not appropriate. Our request is to incorporate additional lot standards into the PD that apply directly to the cluster lots. Because these lots do not have true “fronts”, “backs”, and “sides” we are requesting that a 5’ building setback be allowed from all sides of the lots. Additionally, we are requesting a text change to allow some encroachment into on-lot utility easements only when a written encroachment agreement is executed with the pertinent utility provider(s). This encroachment agreement would be required to be in place prior to issuance of building permits.

In compliance with Section 1513.05 of the Douglas County Zoning Resolution (DCZR) which states “Text Changes – Changes to the text when such changes do not alter the intent of the planned development or the commitments”, these requests do not substantially alter the original intent or commitments of the Pinery Meadows PD in that we are not requesting a change to the density/total number of units or minimum lot sizes, and the proposed cluster product type meets all other standards/requirements outlined in the PD. Additionally, the requested adjustment to add additional lot standards only applies to lots within an existing residential planning area established in the original PD.

In addition to these requested text changes, we have been asked by Douglas County Staff to make minor changes to the PD to clarify that there is a 0’ setback for the shared lot line of single family attached products, as well as revise the “private alley” notation in the typical lot layouts to “private road” to better reflect the applicable intent of the typical lot layouts. These changes have been requested by County Staff to “clean up” the document for future use by the County.

The following page contains additional justification of how we believe this application meets the Major Amendment Approval Criteria as outlined in section 1520 of the DCZR.

Approval Criteria:

1520.01 Whether the amendment is consistent with the development standards, commitments, and overall intent of the planned development.

The proposed amendment maintains the development standards, commitments, and overall intent of the planned development. All original lot standards remain in place, and this request is to add alternative lot standards that will only apply the cluster single family detached lots. All cluster lots are separated from the public right-of-way by tracts that are at least 6' in width. This dimension, when paired with the requested 5' setback for all sides of the cluster lots, provides a building setback from the street consistent with the 10' front setback listed in the original PD. Any encroachments into on-lot utility easements will give the builder of this product the necessary room to place window wells, HVAC equipment, and other accessory building features that provide future homeowners required life/safety features. As previously stated, these encroachments are only allowed with written consent from the pertinent utility provider(s).

1520.02 Whether the amendment is consistent with the intent, efficient development and preservation of the entire planned development.

This proposed amendment is consistent with the efficient development and preservation of the entire planned development in that it allows for the construction of a housing type that reflects the anticipated density of the single family residential planning area. The original PD restricts development to the east portion of the overall site to preserve the Cherry Creek floodplain. To achieve the desired density smaller lot sizes are permitted for single family detached. The cluster lots comply with the minimum lot size, and this Amendment does not affect that standard in the PD.

1514.03 Whether the amendment will adversely affect the public interest or enjoyment of the adjacent land.

The proposed amendment will not adversely affect the enjoyment of the adjacent land or the public interest. The requested 5' setback for all sides of the cluster lots provides the same building separation as the original PD (min. 10' between houses). The homes will also be effectively set back from the public right-of-way by an amount similar to other lots/product types in the overall development and provide a consistent feel along the public right-of-way.

1520.04 Whether the sole purpose of the amendment is to confer a special benefit upon an individual.

The proposed amendment does not confer a special benefit upon an individual. It is meant to provide the necessary flexibility for construction of the cluster single family detached lots and its intent will be general in application to whatever party constructs these lots.

1520.05 For applications proposing an increase in the intensity of allowed land-uses, included changes in densities, whether the amendment is consistent with the water supply standards in Section 18A, Water Supply Overlay District, of this Resolution.

The proposed amendment does not propose increases or changes in the intensity of allowed land-uses, including changes in densities, and remains consistent with the water supply standards in Section 18A, Water Supply Overlay District, of this Resolution as was determined at the time of approval of the Preliminary Plan.

1520.06 Whether the public facilities and services necessary to accommodate the proposed development will be available concurrently with the impacts of such development.

All public facilities and services necessary to accommodate the proposed development will be available concurrently with the impacts of such development, as was determined at the time of approval of the Preliminary Plan.

1520.07 Whether the roadway capacity necessary to maintain the adopted roadway level of service for the proposed development will be available concurrently with the impacts of such development.

Roadway capacity necessary to maintain the adopted roadway level of service for the proposed development will be available concurrently with the impacts of such development as was determined at the time of approval of the Preliminary Plan.

We appreciate the Douglas County staff's review of this Amendment and look forward to receiving your comments soon. Please do not hesitate to contact me at 303.892.1166 or at crunge@norris-design.com with any questions you may have.

Sincerely,

CORE Electric Cooperative	04/14/2026	<p>Verbatim Response: CORE Electric Cooperative does not support approval of the proposed amendment to the Planned Development (PD). The applicant is requesting a text amendment that would allow encroachments into on-lot utility easements upon execution of a written encroachment agreement with the affected utility provider(s). CORE will not execute or provide an encroachment agreement to allow encroachments within utility easements, with the sole exception of second-story eaves, subject to review and compliance with CORE standards. CORE does not approve proposed PD Notes 1, 2, 3, and 4. The proposed reduction of building setbacks and allowance of encroachments within platted utility easements is inconsistent with the purpose and function of utility easements as recognized by Douglas County. These changes would adversely affect CORE’s ability to maintain required clearances to structures, in accordance with the CORE Builder Handbook, and to other utility facilities. Further, the proposed encroachments would hinder safe, unrestricted, and continuous access necessary for the operation, maintenance, repair, and replacement of electric utility infrastructure. RE: Project ZR2026-003

The Pinery Homeowners' Association appreciates the opportunity to provide comments regarding the rezoning within the Pinery Meadows Planned Development. We have no concerns about the amendments regarding single-family cluster homes.

However, as we articulated in our response to **SB2025-045** in January of this year, our foremost concern is and will continue to be the significant and ongoing traffic challenges at the intersection of North Pinery Parkway and SH-83. These challenges will be further exacerbated by the traffic generated not only by this development, but also by the cumulative development in the surrounding area. This intersection has long presented serious safety, congestion, and accessibility issues for our residents and the broader community, and it remains the central focus of our concerns. We will remain committed to ensuring that this need is fully recognized and acted upon.

Respectfully,

ADDRESSING ANALYST:

1. No comment.

RESPONSE: Noted, thank you.

BUILDING SERVICES:

2. No comment.

RESPONSE: Noted, thank you.

CORE ELECTRIC COOPERATIVE:

3. CORE Electric Cooperative does not support approval of the proposed amendment to the Planned Development (PD). The applicant is requesting a text amendment that would allow encroachments into on-lot utility easements upon execution of a written encroachment agreement with the affected utility provider(s). CORE will not execute or provide an encroachment agreement to allow encroachments within utility easements, with the sole exception of second-story eaves, subject to review and compliance with CORE standards. CORE does not approve proposed PD Notes 1, 2, 3, and 4. The proposed reduction of building setbacks and allowance of encroachments within platted utility easements is inconsistent with the purpose and function of utility easements as recognized by Douglas County. These changes would adversely affect CORE's ability to maintain required clearances to structures, in accordance with the CORE Builder Handbook, and to other utility facilities. Further, the proposed encroachments would hinder safe, unrestricted, and continuous access necessary for the operation, maintenance, repair, and replacement of electric utility infrastructure. Preservation of utility easements free of structural encroachments is essential to ensure public safety, service reliability, and long-term maintainability, and the proposed PD amendment does not adequately address these considerations.

RESPONSE: Per direct discussion with CORE, it is understood that notes 1-3 are already part of the approved and recorded PD and will not be changed. Regarding note 4, it has been clarified with CORE representative Brooks Kaufman that note is a general note that does not apply specifically to CORE easements, and CORE maintains the right to prohibit any encroachments into their easements. Brooks Kaufman confirmed that CORE does not have any issues with proposed reductions in building setbacks or lot standards for cluster single family detached product "Provided that the required structural setbacks are met, and that no improvements are placed within the utility easement that conflict with or interfere with the construction, maintenance, or access to electric facilities, CORE Electric Cooperative has no further objections." Development will comply with required structural setbacks and limitations of easements. Additionally, at the request of CORE there are notes included on the recorded Final Plat and under-review Site Improvement Plan that outline restrictions of improvements within utility easements across the site.
