RE: Douglas County of public Works Drainage Program

To Whom it may Concern,

Shelbourn Enterprises (SE) has been contracted for \$75K for on call drainage activities for Douglas County Special Projects Engineering. As of 6/28/2024 our records show that SE has been requested to clean and or repair the following locations:

1. Heatherwood Court Repair and backfill
2. Springer Drive Inlet and manhole clean
3. Dual 126" Culverts at Broadway & Northridge dam water and clean culverts
4. Lincoln Ave traffic control and culvert cleaning
5. Prepare a request for Pinery – Lakeshore/Tempest Ridge Way.

At this time our invoices reflect that we have been paid \$27,650.00 which leaves \$47,350.00 remaining in the existing contract. Lincoln Ave is estimated to be \$51K. Therefore, SE is requesting an increase to the existing contract by \$105,000.00 to allow for Lincoln Ave Cleaning, the Pinery to be addressed and have additional dollars left in the contract to allow for the County's requests future possible on call services. SE has been providing estimates for each work order prior to the work being authorized due to each task having different requirements for traffic control and site impacts.

Sincerely,

Sean Shelbourn

Shelbourn Enterprises
