

AGENDA MEMORANDUM

To: Rueter Hess Recreation Advisory Board
Thru: Ron R. Redd, P.E., PWSD District Manager
From: Maleia Good, Project Manager for PWSD
Title: November Fishery Update

Discussion items for the RAB:

- Aqua Sierra was onsite for the fishery management survey Oct 9th and 10th. Initial analysis showed evidence of *reproduction* in the walleye species, along with first time capture of blue gill. Aqua Sierra will have a preliminary summary report to the RAB to help plan with 2025 fishery programming very soon, along with the 2024 annual fishery management report at the beginning of the year.
- Fish habitat boulders have been relocated from The Canyons Tank to Rueter-Hess. PWSD staff and Aqua Sierra have coordinated to wait until spring to do any “placement” of the boulders. Recreation docks information will be helped to determine fish habitat placement.
